

## Detach From Reality

My pictures help me to detach from reality and to put all my surreal ideas into a photo that helps me to pass on that feeling into an expressive art piece.

I work with stencils and other physical instruments and use them in my pictures I print of. This escapism helps me feel content and relaxation, even if it has such a dark look to it.

I was diagnosed with Autism at the age of 4-6 which made me feel more of a different person than the other kids but that never had a negative effect on my life as I knew that I saw things different but that was all to it.

I'm blessed to have it as I feel that being different should be the new normal, other than trying to be societies exceptions and trends in this mainstream world.

I hope my work helps for all as much as It helps me making it. Imagine, Think, Create.

Kingdom Hudson
